**DETAILED ACTION**

- This office action is responsive to the following communication: Amendment filed on 01/18/2007.
- **Claims 1-10** have been cancelled. **Claims 11-33** are pending in the application.

*Allowable Subject Matter*

1. **Claims 11-33** are allowed.
2. The following is an examiner's statement of reasons for allowance:
3. The prior art of record does not teach, disclose or suggest the claim limitations of (in combination with all other limitations in the claim) "transforming the printable content in the print file in accordance to print options whereby the transformed print file produces a printed output different from a printed output that would have been generated by the printer driver, and wherein the printable content that is transformed is selected from at least one of banners, advertisements, solid background, user highlighted content, and any combination thereof". The closest prior art, cited Simpson et al. (US Pub. 2003/0011801 A1) and Yu (US Patent 6,707,568 B1), only teach controlling printable content by monitoring for a print request matching a print file with stored identification data, intercepting the print file generated by the print driver and transforming the print file in accordance to with the stored print options, and transforming the print file in accordance with the stored print options. Neither Simpson nor Yu teach "transforming the printable content in the print file in accordance to print options whereby the transformed print file produces a printed output different from a printed output that would have been generated by the printer driver, and wherein the printable content that is transformed is

selected from at least one of banners, advertisements, solid background, user highlighted content, and any combination thereof", as claimed in independent Claims 11 and 19. Similar features are claimed in Claims 12-18 and 20-33. Therefore, Claims 12-18 and 20-33 are allowable over the prior art of record for the same reasons.
